

Coursera: Online learning Platform

Promoting and encouraging students and faculty to learn various courses through Coursera online platform

It was an onset of Covid pandemic situation and students were confined in their houses. The challenge was to keep students engaged by engaging them constructively so that they will be able to upgrade themselves in various ways.

It was found that amongst the various online resources Coursera was wonderful online learning platform offering excellent courses including academic and non- academic which can help the students to enhance their knowledge and abilities in various domains.

So the college registered for this online platform so that students could have a free access for different course they wish to pursue. Thus the main objective of registering for this coursera online platform was to provide self learning facility to all the students of the institute.

The active participation by the students and even faculty members earned 6700 certificates in almost 500 different courses and which provided great knowledge enrichment for the students and faculty members.

Courses like Introduction to solar cells, Electric Power systems, Wind Energy, Programming for everybody (Getting started with Python), Python Data Structures, AI for everyone, building web applications in PHP, Six sigma Principals, Graphic Design, The bits and bytes of computer networking, cyber security and internet of things, Material Science, How to learn to learn are some among the many courses successfully completed by the students.

The student were glad to see a big list of courses offered by Coursera and enrolled in the desired courses which would provide self-learning in the domain to acquire job-based skill sets and may be overall grooming too.

Students from all the departments actively participated in various Courses. Almost 6700 certificates were received by students and faculty members.
