Students were made aware for giving importance and attention towards the basic aspirations and concerns in their life. One can even look on the concept of "Happiness" and "Prosperity", as they (students) could see the prosperity and depravedness are the feelings within themselves. One can decide the underlined feelings for any activity one can do. Since students are clear about the co-existence of self and body, as human being, they could see the relationship is between two selves. The feelings in the relationship can be observed and those are definite.</b>
